An Octopus's Garden

Surface Pattern Design Lookbook

By Michelle Harris

Exploring the magical worlds, under the breaking waves, where wild and beautiful gardens are emerging.

Creatures dance and play, as the coral sways back and forth. Tides ebb and flow, and seahorses pirouette amongst the entanglement of seaweed.

Bubbles raise up to the surface, and sand shifts below.

Somewhere in the middle, the octopus's garden grows...

Michelle Harris Designs

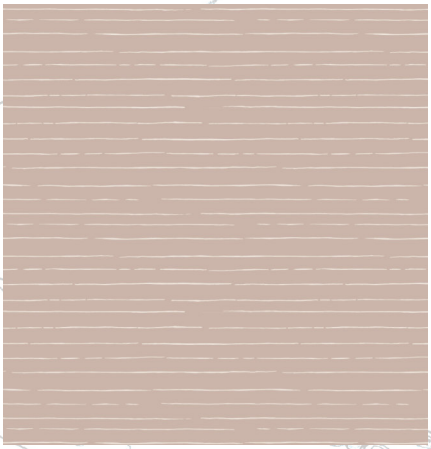

An Octopus's Garden

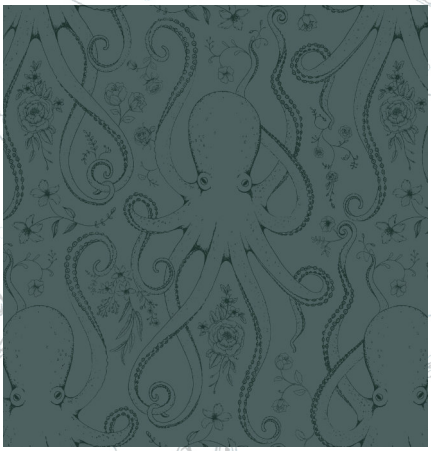

Florals and corals are intertwined in this collection, creating a slightly fantastical depiction of an 'Octopus's Garden'.

Underwater creatures such as seahorses and nudibranchs, appear to swim alongside quintessentially English roses, and bouquets of flowers are held between the reaching tentacles of an octopus
